

AUDIT AND REPORT

Risk assessment of digital position; Pool members

Compliance online is law, not an option, just as Cyber once became unavoidable and Pools responded with cover and guidance. Pools now need a Risk Control Program that cuts claims and gives confidence to members.

ADA and Privacy are risks that come with being online. ADA is particularly significant because the majority of members remain unnecessarily exposed, and vulnerabilities are easy to prove. In the same way buildings must offer reasonable accommodation, so must websites, yet most do not. The difference is that lawyers profit heavily from these failures.

Despite billions already spent, exposure has not reduced. Vendors are continuing to offer compliance promises, yet members remain at risk as they struggle with the complexity of regulations.

The enclosed audit of a sample of CharterSAFE members confirms widespread exposure. If just 10% of members are targeted (ADA, let alone Privacy violations) it equates to \$2.6m in wasted money and over 6,400 hours of lost time (the distraction often having the biggest impact).

The scale of exposure (whether against members directly or through actions covered by the Pool) underpins the need for a new program. Our program mitigates the majority of the risk, reduces compliance costs, demonstrates innovation and sets a standard for member protection.

INTRODUCTION

Compliance online is unavoidable. Failures are easy to prove, making litigation frequent. The sooner risks are addressed; the sooner the distraction removed. Just as no entity can occupy a building outside code, the same applies to websites.

The requirement for websites to comply with the Americans with Disabilities Act (ADA) (**and State Privacy rules**) is not going away. Organizations that ignore this are likely to face litigation, negative public opinion, and much higher costs than those that take immediate action.

In the same way that we expect buildings to accommodate people living with disabilities, inclusivity for all is expected online.

Due to lucrative rewards and the ease of demonstrating non-compliance, litigation is growing exponentially across all sectors – one of the softer targets being education, with digital footprints that have grown rapidly, especially post COVID. Members regulatory compliance has failed to keep pace, leading to risk exposure and vulnerability.

Compounding the problem is a false sense of security, felt by many who believe that they have matters in hand, spurred on by service providers that promise compliance but lack accountability.

There are solutions; ours is AAAtraq “Risk Control Program” (deployed in 3 stages Clarity, Control and Confidence) making the assessment of risk easy to understand, *clarity* (non-technical reporting and monitoring) step-by-step guidance for members to follow putting them in *control*, in doing so they are gaining *confidence* as risk mitigated with additional protection from litigation with costs coverage.

*Dealing with ‘Digital Risk’ is **not an option** - it’s a must for all.
The forward-thinking pools **are removing the complexity** and unnecessary risks and **saving members millions.***

Andrew Grant
Chair – Diversity and Inclusion Committee.
“Innovation; removing member distraction – saving time and money, whilst driving down exposure, a clear use of Ai ‘for good’.”

PRIVACY - STATE OF THE NATION

Illegal data collection, particularly involving minors, has serious consequences. Pools must ensure members understand obligations; as cyber coverage may only apply if reasonable care is shown. A Risk Audit is the basic step that protects both member and Pool.

For each member, the priorities;

AUDITING

State law(s) obligates the completion of Risk auditing, check you:

- 1. Know all the websites you actually have
- 2. Audit data collected, both visible (forms) and (via technology) invisible.

MINORS

Specific regulation covers minors and the collection of any data from them – first you MUST know where, what data is being collected.

TRANSPARENCY

An obligation placed on organizations to provide notice to consumers about data practices.

PURPOSE

An EU General Data Protection Regulation–style restrictive structure that prohibits the processing of personal information.

SUMMARY

With widespread lack of compliance, litigation is easy money as it is so easy to highlight failures, the sooner tackled the sooner the exposure and distraction removed. Like building you can't use one that doesn't adhere to the law - same for online.

The results from the sample members are on the next page. This provides executives with their own independent monitoring of digital fundamentals, confirming where exposure affect value and reputation.

Confirmation comes from analysing the impact of issues across **ADA** 'Accessibility', **Privacy**, and *Environmental* performance (*latter being evolving regulation – one to be aware of, but not a priority to resolve*) with AI ensuring this can be delivered effectively across the digital estate. Grades run from A (OK) to E (significant issues).

Without understandable clarity, exposure remains hidden. The results show where risk is controlled and where weaknesses require attention, giving executives trusted evidence to protect value and reputation.

10% of members are worth \$2.6m against claims which are indefensible.

Pools / members are easy, rich pickings.

A walk through of the findings is available on request – members may also be interested in the impact analysis of issues showing where value is being undermined on their websites.

The Audit of full membership should be considered as your next stage, offering the board an unbiased view as to its exposure.

ADA - HIGHER PROFILE CLAIMS

ADA – for websites is here, litigation is easy money as it is so easy to prove failure, sooner tackled the sooner the exposure, and distraction goes away. Like building you can't have one that doesn't adhere to the law – same for online.

Brown Goldstein & Levy

[People](#) [Practices](#) [News](#) [Why BGL](#) [Big Wins](#) [Q](#)

BGL team secures \$240,000 jury verdict for blind students in discrimination lawsuit against the Los Angeles Community College District.

JUNE 2, 2023

Brown, Goldstein & Levy attorneys Jessie Weber, Kevin Docherty, Monica Basche, and Sharon Krevor-Weisbaum have secured a major victory with the help of the National Federation of the Blind (NFB) and NFB of California on behalf of two blind students, Portia Mason and Roy Payan, who were deprived an equal educational opportunity, in violation of the Americans with Disabilities Act (ADA), by the Los Angeles Community College District (LACCD) – the largest community college system in the nation.

A jury found that LACCD violated the ADA in 14 different ways and, in most cases, did so with deliberate indifference. The jury awarded the plaintiffs over \$240,000 in damages and attorneys' fees. The attorneys are pleased with the verdict, which they believe will encourage other schools to improve their accessibility. Ms. Mason and Mr. Payan are grateful for the support of their attorneys and the NFB. They hope the verdict will encourage other schools to improve their accessibility. The attorneys are pleased with the verdict, which they believe will encourage other schools to improve their accessibility. The attorneys are pleased with the verdict, which they believe will encourage other schools to improve their accessibility.

SEE HOW EASY IT IS.....

Want to see how easy it is to assess the risk of a page (or website) ?

Use ours ?? it is free, takes 30 seconds and doesn't ask for any contact (email, name etc) information.

1. Visit www.AAAtraq.com/check
2. Key in the website in the box
3. Hit the button (check now)

Results map risk (AAAtraq is not a technical report, for diagnostic detail, we have a different service used by developers at www.SItemorse.com/check).

PRIVACY AUDIT

We are combining Privacy auditing presently, this will be available from October. If you want to audit privacy, you can for free please visit www.rethinkingprivacy.com

HOW LONG?

It took us 24min to identify members, failures...

How long before actions filed against pools?

With the cost of one
demand equivalent to
10¹ years subscription...

Isn't the greatest risk
not having AAAtraq's
Risk Control Program?

*Kicking off with independent
clarity as to Risk should be a
no brainer* ”

¹Average 'demand' claim costs, which includes; settlement, legal fees [external], limited initial remediation and a contribution to internal costs \$31,420. This is based on demand settlement, within 125 days of receipt. Escalation to full claim, costs rise significantly; 3 to 10 times, or more.

AAAtraq RCP (Risk Control Program) per pool member, website less than \$3,000

A trusted partner to the industry's largest risk pools.

40+ years

of pool management
experience

\$1 billion

carrier premium

23 pools

managed by 150+ dedicated
pooling team members

We don't just manage self-insured pools - we help them thrive.

Trusted by 3,000+ public entities, we become an extension of your team, delivering pooling services tailored to your unique needs.

From underwriting and claims management to risk control, reinsurance placement and financial services, we strengthen your pool's operations while protecting its reputation and bottom line.

Our proprietary, AI-enabled software streamlines policy issuance and decision-making, while our world-class data analytics team uses the richest insights available to drive smarter strategies. And with dedicated marketing and training experts, we can boost member participation, support onboarding and strengthen your capabilities for long-term stability and success.

AAAtraq®

SaaS products developed for 25 years. Launched the ADA Risk Control Program in 2021 (mapping risk using 3.7 trillion data points), added privacy in 2024. Recently introduced AI to understand digital fundamentals and show how failures impact Value and Risk.

Our Risk Control Program (RCP) for Pools is purchased and deployed in three stages. Each stage can be taken on at a suitable pace, ensuring members achieve maximum usage and value.

Stage one provides clarity by showing where members stand and gives assurance that the Pool has already taken steps to support them. We administer and support the Program throughout, with little or no setup required by the Pool.

CLARITY (Stage | one)

Independent, unbiased auditing of member websites with non-technical ranking of both Value and Risk. Results highlight legal and reputational exposures and show where changes improve experience, search optimisation, and trust.

Pools use this evidence to identify where members increase risk exposure and to track progress. Monthly audits are supported by Q&A sessions and quarterly *topical* updates.

CONTROL (Stage | two)

Most claims (9/10) relate to content failure. Despite vendor claims, no website can be kept compliant by a platform alone.

We remove complexity with products tailored to members' website needs. Using AI and content analytics, compliance management and correction can be completed in under three minutes. **Anyone who can send an email can resolve at least 60% of today's exposure.**

For Pools, exposure is reduced within weeks. Millions can be saved with compliance complexities now resolved in minutes.

CONFIDENCE (Stage | three)

As the final stage of the service; legal support, costs coverage and claims management are combined to give members confidence whilst they mitigate their risk. If you already have coverage, the RCP is essential to help limit your claims.
